

Are you interested in wirelessly connecting your hearing aids to your mobile phone, mp3 player or TV?

Do you struggle to use audio devices and your mobile phone with your hearing aids at the moment?

Could a remote control make it easier for you to enjoy extra programs and volume control?

If so, you may benefit from the Bluetooth devices detailed in this leaflet.

If you are interested please speak to an audiologist who can help you to decide.

This leaflet is available in large print and other formats and languages.
Please ask a member of staff for further details
