You asked

Since 1 March 2020 up to the present day (17th December) please can you tell me how many patients with respiratory conditions were admitted to covid-19 wards at the trust.

Between March 1st 2020 and Jan 31st 2021 there were a total of 44 distinct patients discharged from University Hospitals Plymouth NHS Trust where patient had confirmed Covid 19 status and had one of the respiratory Health Record Groups quoted recorded against their spell.

Please include the date they were admitted.

This information is person specific and refused in compliance with section 40(2) the Personal information exemption. Please refer to the legal notes below.

Please can you also tell me how many of these patients were tested for covid-19

All in-patients are tested for Covid-19 on admission and retested at regular intervals.

Please also include the date of the first test, the date of the result and whether the result was positive or negative.

This information is person specific and refused in compliance with section 40(2) the Personal information exemption. Please refer to the legal notes below.

If you are unable to answer these questions, please could you tell me how many patients with respiratory conditions were admitted to covid-19 wards at the trust and how many of these patients tested positive for covid-19 before they were admitted to a covid-19 ward.

As per Q1 patients are 44 patients were discharged from Covid -19 wards. Patients would test positive before being admitted to a Covid 19 ward.
