You asked

On average how many patients receive intravenous cancer drug therapies (includes monoclonal antibodies (mAbs)) on a daily basis across all hospital chemotherapy day units in your organisation/Trust?

Our reply

36 – This answer is an average of all daily day case attendances for chemotherapy treatment across all chemotherapy day units within the past six months (1st Apr 2016 – 30th Sep 2016). Chemotherapy day units include Oncology Chemotherapy Day Case Unit, South Hams Day Case Unit, Tavistock Day Case Unit, Liskeard Day Case Unit and Birch Day Case Unit where the activity is recorded under PHNT.
