### You asked

1. The Trust's safe staffing data for October 2016

I have attached an example of the data I am seeking (Dartford and Gravesham's safe staffing data for September 2016). I would like the information provided in this format - an Excel spreadsheet as an .xlsx file, including both the "fill rate indicator return" for nursing, midwifery and care staff for all wards across the Trust, and the "site summary".

I am sending this request because I note that many Trusts do not keep their online safe staffing data pages properly updated.

If information for October 2016 is not available, please provide the information for September 2016.

### Our reply

We publish the Safe Staffing figures as part of our Trust Board Report (Public Section).

<https://www.plymouthhospitals.nhs.uk/trust-board-meetings-and-papers> page 54 of the PDF document for the September 2016 papers.

I have attached the September submission, as this is not currently on the website. The October data is not available yet as we have not submitted this information to the Department of Health.
