You asked

A breakdown of deaths due to septicaemia in the Trust's facilities for the years 2014, 2015 and 2016.

For each death please specify:

- a. The facility where the death occurred
- b. A comparison between the HSMR expected death figure for the year and the actual figure for the year
- c. The age of those who died, by age group; years 0-1, 2-5, 6-10, 10-20, 21-35, 36-60 and 60+
- d. Any outcome of an investigation into the deaths eg whether the patient arrived with a suspected septicaemia diagnosis or they developed it in hospital

Our reply

The Trust does not hold the information. The Trust does not have access to death certificates and therefore cannot report the information requested.
