

Are you interested in wirelessly connecting your hearing aids to your mobile phone, mp3 player or TV?

Do you struggle to use audio devices and your mobile phone with your hearing aids at the moment?

Could a remote control make it easier for you to use extra listening programs and volume control?

If so, you may benefit from the Bluetooth devices detailed in this leaflet.

If you are interested please speak to an audiologist who can help you to decide which option is best for you.

Please note: the Compilot II and other equipment described in this leaflet are only compatible for Phonak hearing aids.

Streamers and Bluetooth devices are available for other hearing aid brands, please see leaflet racks for information about other products or ask a member of staff.
